The HVAC Inspection, Maintenance
and Restoration Association

FACTS YOU MUST KNOW

Contaminated Air

If your HVAC system's ductwork is dirty, air pollutants, dust, chemicals, pollen, mold, bacteria and dander will be pulled through the system and circulated into the air you breathe inside your home.

Fire Hazard

Clogged dryers pose a fire hazard as it reduces the airflow in your system which leads to excessive overheating and potentially a fire risk. In the US alone 15,500 fires are caused every year by dirty vents.

**CARBON
MONOXIDE**

BE ALARMED!

**THE
SILENT KILLER**

WHAT YOU CAN'T SEE BUT CAN HURT YOU

Carbon monoxide (CO) is a colorless, odorless deadly gas. Because you can't see, taste, or smell it, carbon monoxide can kill you before you know it's there.

Gas heaters can produce dangerous levels of carbon monoxide when dust or dirt builds up, ducts become blocked or the combustion process does not properly occur.

"OUR GOAL IS TO IMPROVE YOUR INDOOR AIR QUALITY"

The Health Investment

"The average child eats 15 to 20 milligrams of dust a day, and superslurpers eat 30 to 50 milligrams."

By science Author- Hannah Holmes

In a typical six-room home, approximately 40 pounds (20 kg) of dust is accumulated annually through everyday living.

HOW AIR DUCT CLEANING IMPROVES EFFICIENCY

You Save Money

On average after air duct cleaning, households experience a decrease up to 19% in their energy bills.

It also helps heating and cooling systems to operating at the optimal level and prolongs the life of your systems. This will save you the hassle any potential mechanical failures in the future.

Efficient Time Saving

House is dusty even though you clean it regularly? Find this frustrating and time consuming?

Air duct cleaning is your solution. After our air duct cleaning service you will be surprised from the reduction of dust in your home and this will save you hours of cleaning.

"CLEAN YOUR DUCTS FOR ALL THE RIGHT REASONS"

CLEANING PROCESS

MR DUCT CLEANING TECHNICIANS ARE ALL CERTIFIED BY NADCA WITH EXTENSIVE KNOWLEDGE IN THE INDUSTRY. WE EQUIP OUR TECHNICIANS WITH THE LATEST TECHNOLOGY IMPORTED FROM US SPECIALIZE IN DUCT CLEANING PROCESS TO ASSURE THAT YOUR DUCT SYSTEMS ARE CLEANED FROM TOP TO BOTTOM AND APPEAR TO BE "LIKE NEW".

STEP 1 CARBON MONOXIDE TEST

Mr Duct Cleaning technicians started by performing a carbon monoxide testing to ensure the heating or cooling system is working properly without any faults or leakages to provide our customer a peace of mind.

STEP 2 CLEAN VENT REGISTER

Mr Duct Cleaning technicians will carefully disassemble every grills or air filters attach to your air duct openings and clean them using high compressed air pressure to blast all pollutants away.

STEP 3 CLEAN THE HEATING UNIT

Mr Duct Cleaning technicians then systematically clean the fan, motor, air filter, all internal compartments with high compressed air pressure generated from van-mounted ultrasonic tank.

STEP 4 CLEAN THE RETURN AIR DUCT

Mr Duct Cleaning technicians continues cleaning the return air duct and all duct lines using powerful duct cleaning and vacuum machine with a long hose and flexible rotating brushes to break & collect all the contaminants.

STEP 5 SANITIZE THE SYSTEM

Mr Duct Cleaning technicians finishes by sanitizing and deodorizing the duct system with Bactigas- the natural tea tree oil based compound to possess antimicrobial activity and leaving a fresh, clean fragrance.

THE SERVICE WE PROVIDE

RESIDENTIAL AIR DUCT CLEANING

Your home is your castle and where you feel safe and secure. You and your family spent most of your spare time there. But is it really safe? Do you really know what is hidden in your duct system?

Imagine how will your kitchen table/floors look after five years with no cleaning at all. So you can get a rough idea of how the duct system should look! The duct system is like the lungs of your home. And when you doesn't clean it properly, it's polluted with dust, bacteria, pollen, etc.

YOU SHOULD CLEAN YOUR AIR DUCTS WHEN :

- Dust accumulates quickly, even right after cleaning
- Visible dust, debris build-up around the air return vent & duct
- New home or after renovation such as tiling or plastering
- Musty or stale odor when the system is on
- Symptoms of allergies, asthma, or breathing problems
- Never had your duct serviced & cleaned
- HVAC system not performing as it supposed to
